### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 5-6, 7, 11-12, 13, 17-18, 19 and 23-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Reasoner et al (6,634,553).

Regarding apparatus, method, article of manufacture and system claims 1, 7, 13 and 19 Reasoner discloses,

A picker assembly (fig. 1 block 10 in connection with col. 5 line 1);

Illumination sources disposed at the front of the picker assembly for illuminating an object (note col. 5 line 4-6, led illumination source);

An imager disposed on the front of the picker assembly for gathering image data of the object (note col. 5 lines 8-9, ccd is the imager)

A processor, coupled to the imager and illumination sources, for thresholding the image data obtained from the imager and for controlling the illumination source (note col. 5 lines 27-29, processor mounted to picker to control the device)

Art Unit: 2625

Wherein the processor uses bounding boxes to identify the location of a desired physical feature in the thresholded image (note col. 4 lines 30-32, examiner interprets the storage slots as a bounding boxes).

Regarding apparatus, method, article of manufacture and system claims 5, 11, 17 and 23 Reasoner discloses,

Wherein the desired physical feature comprises a top left intersection of a vertical and horizontal member of a cartridge cell within a tape library system (note col. 4 lines 43-44, array comprises location in a data cartridge).

Regarding apparatus, method, article of manufacture and system claims 6, 12, 18 and 24 Reasoner discloses,

Wherein the position of the intersection relative to the image is used to calibrate the physical position of the picker assembly (note col. 3 lines 62- col. 4 line 7, picker is moveable directed by a control system).

### ***Allowable Subject Matter***

3. Claims 2-4, 8-10, 14-16 and 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter for claims 2, 8, 14 and 20. The prior art fails to teach the specific limitation of the processor locating bounding box as claimed. These features, in

Art Unit: 2625

combination with other limitations, are not taught in the prior art. Claims 3-4, 9-10, 15-16 and 21-22 depend on claims 2, 8, 14 and 20. Therefore are also objected.
